

# PD Stream patient progress report

HWU

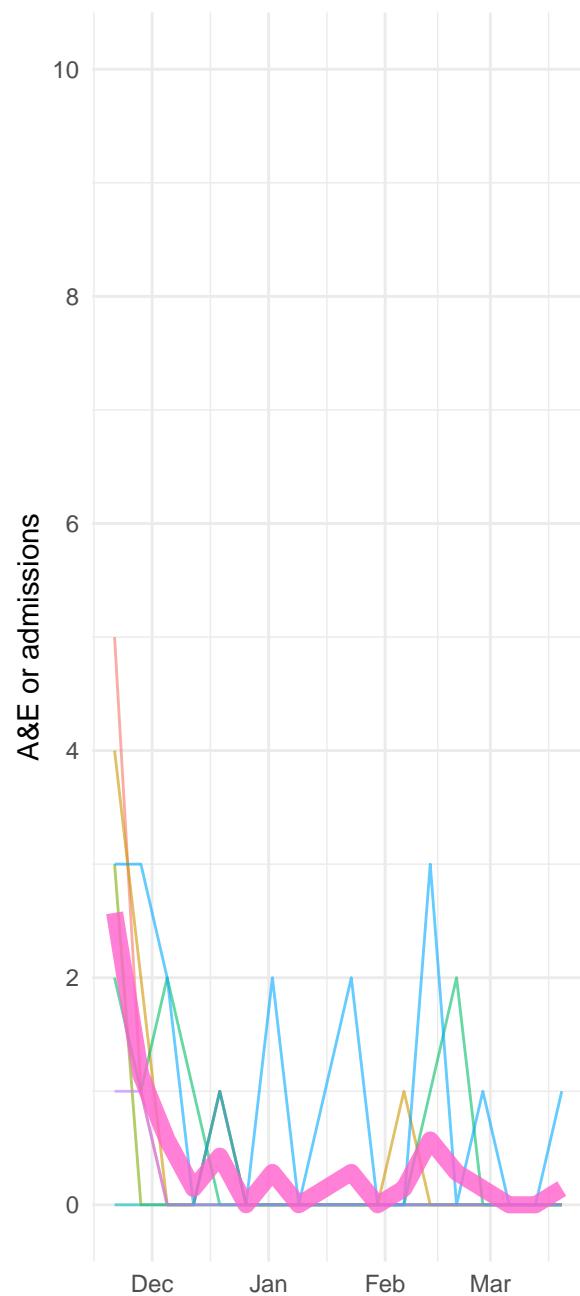

01 April, 2023 @ 13:40

## HWU Weekly Coping estimate

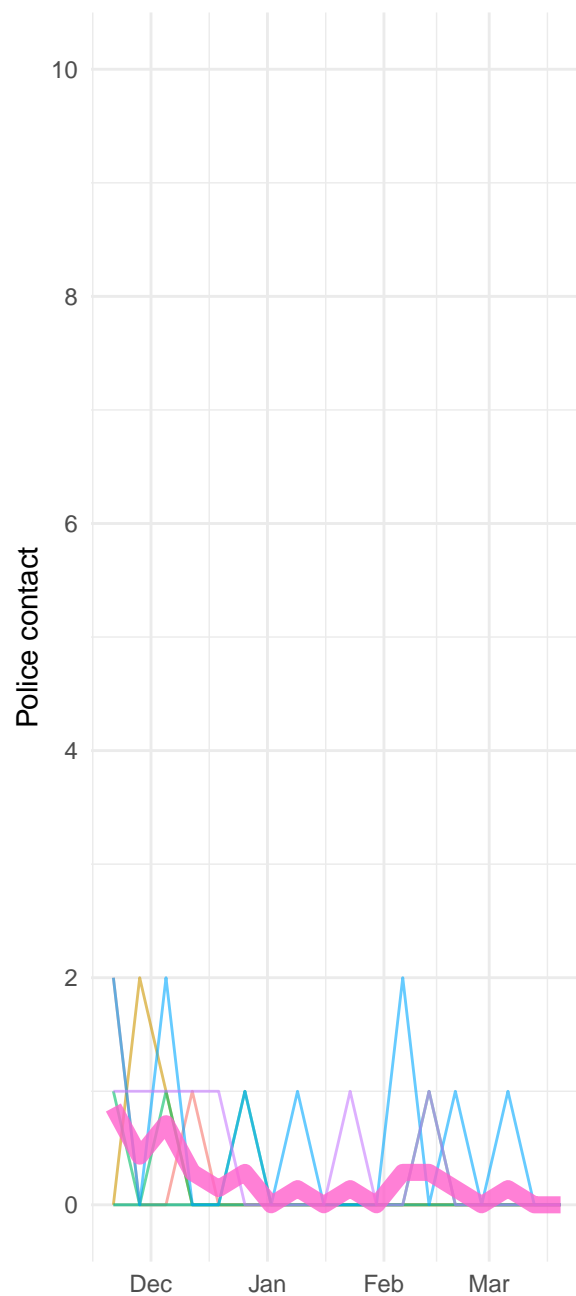

We are asking our patients at the beginning of each weekly individual session (typically weekly or fortnightly) to tell us how they have felt overall for the past week on scale from 0 to 100 %. We also ask how many times they have been in contact with emergency or crisis services. We think that patients can remember the previous week quite accurately.

**A** A&E attendance / admissions

**B** Police contacts

**C** Crisis contacts
