

PD Stream patient progress report

HWU

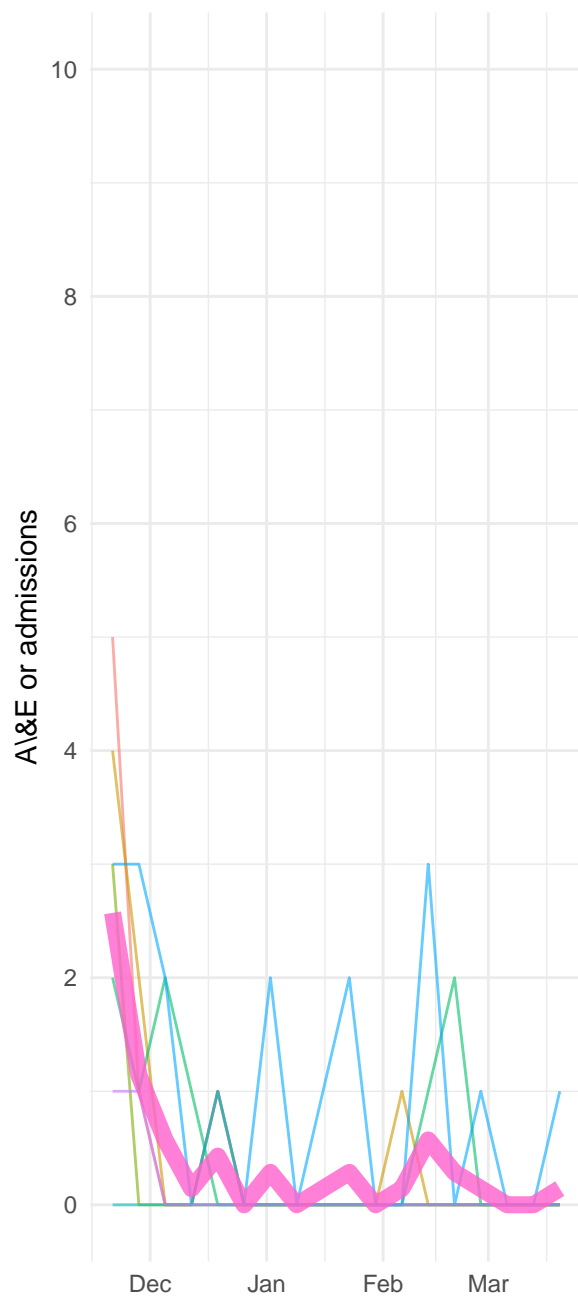

02 April, 2023 @ 12:31

HWU Weekly Coping estimate

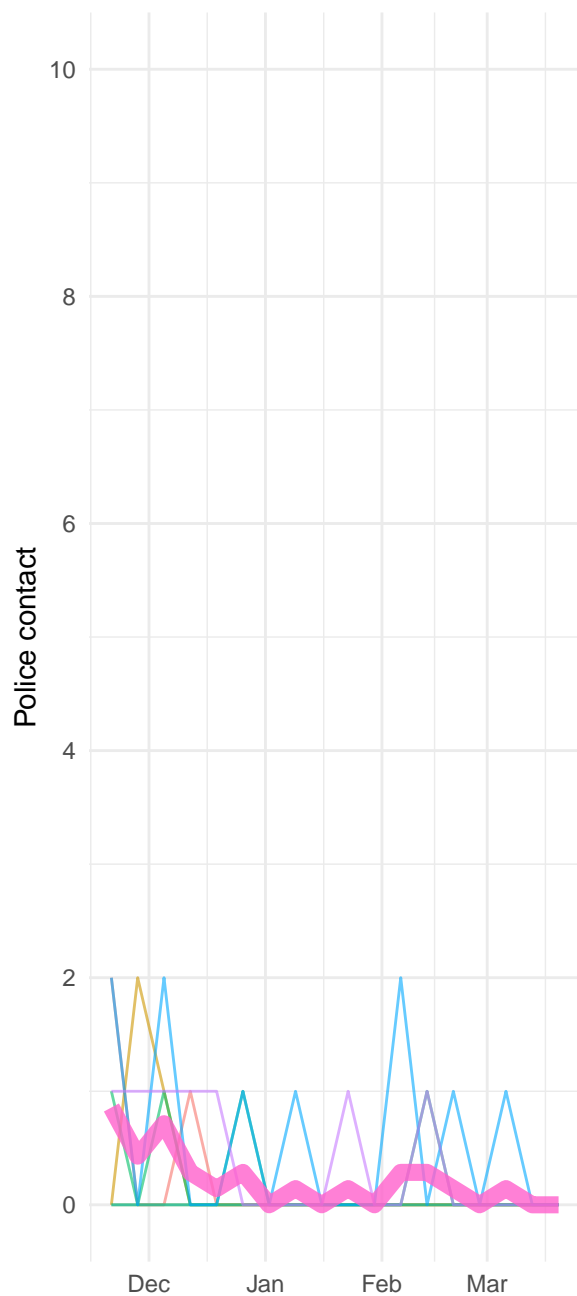

We are asking our patients at the beginning of each individual session (typically weekly or fortnightly) to tell us how they have felt overall for the past week on scale from 0 to 100 %. We also ask how many times they have been in contact with emergency or crisis services. We think that patients' recollection/impression of the last 7 days is fairly accurate.

A A&E attendance / admissions

B Police contacts

C Crisis contacts
